

## Structure characters

J5AP series over-temperature & over-current series protector are all manufactured by automatic machines and their key parts are high-quality bimetal from abroad. They are sensitive to temperature and current with small size ,long endurance life and high performance on cutting off circuit.

## Applications

J5AP Series are widely used for protection against over current and over temperature in auto motor, such as window motor, wiper motor, adjusting seat motor, lock motor etc.

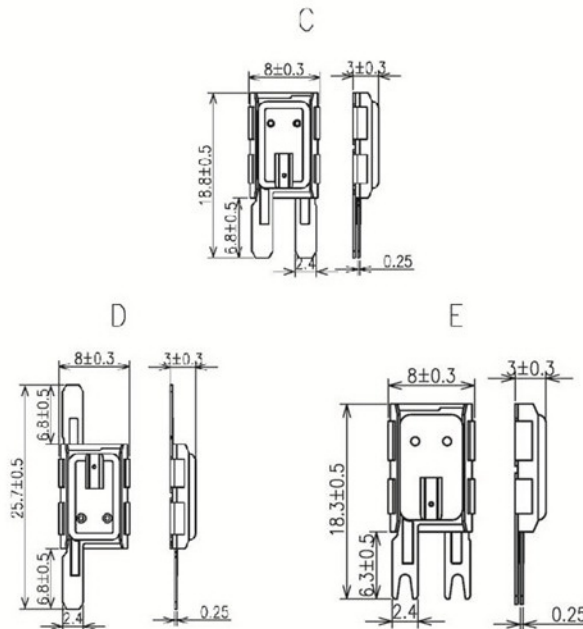

## Parameters

Open temperature:  $35^{\circ}\text{C} \sim 160^{\circ}\text{C} \pm 5^{\circ}\text{C}$  (according to customer's requirement)

Contact capacity:DC30V/14A DC15V/28A

Trip current:3~28A (according to customer's requirement)

Trip time:4S~10S (under ambient temperature of 25C)
